Excerpt: .which is the pristine factor, yet the following, which is the outcome of considerable study, may be offered to the reader, not as a definitive, but rather as a tentative explanation of the different origins of scoliosis. Certain curves of the dorsal region were at p. 25 described as weight-bearing and avocation curves. Others in the same part of the figure were shown to be due to respiratory troubles, and there are doubtless a few other origins of the evil. The far larger number of S curves begin at the loin; the defect there is in some instances immediately, even simultaneously, productive of dorsal curve in the opposite direction, yet in the majority of cases that sequela is of slower advent, in the following manner: The lumbar curvature, by encroaching on higher parts of the column, becomes total, and this, when such a degree is...
